**HD- / ED-REPORT**

*Please type!*

Place: \_\_\_\_\_ Date: \_\_\_\_\_

Name of the dog: \_\_\_\_\_ Male/Female

Stud Book No.: \_\_\_\_\_ Date of birth: \_\_\_\_\_ Readable Tattoo-No.: \_\_\_\_\_

Date of X-raying: \_\_\_\_\_ Microchip -No.: \_\_\_\_\_

Owner: \_\_\_\_\_

Address: \_\_\_\_\_

E-Mail Address: \_\_\_\_\_

**Weight at time of narcosis:** \_\_\_\_\_ kg

The veterinary sends the **X-ray images** together with this **report** and either the **original pedigree** or **registration certificate** to:

Allgemeiner Deutscher Rottweiler-Klub e.V.  
Suedring 18, 32429 Minden, Germany

After the evaluation of the X-rays and payment of the fees the documents are sent back to the owner.

**Confirmation of the veterinary:**

- The pedigree was shown before X-raying. The X-raying was reported there.
- The tattoo-no. or microchip-no. was checked on the basis of the pedigree / registration certificate data and is identical.
- The dog was sedated in sufficient way.
- The hints on the back side were recognized.

The X-ray images will become property of the ADRK by sending in. The owner of the dog agrees to publication and statistical evaluation of the HD- / ED-results. He confirms the identity of the dog by signing this paper.

Date \_\_\_\_\_ Signature/Stamp of the veterinary \_\_\_\_\_

The evaluation of the x-ray images will be conducted by a recognised expert of the ADRK

### Hints for the X-raying veterinary:

Requirements for official X-rays of the Allgemeiner Deutschen Rottweiler-Klub e.V.

1. The examination of hips and elbows must be done together
2. The animals have to be 15 months old at minimum, for recognizing the evaluation
3. Existing clinical symptoms may require an examination at a considerably younger age. In case of a negative result a later examination is necessary like in 1.
4. Both elbow joints must be X-rayed.
5. Lateral exposure (ML) in bent posture (min 45 °), so the processus anconeus is revealed (see draft)
6. Laying on the chest, legs in front of the body (AP); at a symmetric position, so the medial joint line is not overlaid
7. The X-rays in a size of max. 18 x 24 cm must be of high quality, to show also osteophytes and sclerosis
8. Identification of the X-rays
  - a) Name of the owner and of the dog
  - b) Breed, date of birth, stud-book no., tattoo no., micro-chip no.
  - c) Date of X-raying and side markings

Draft:
